

LIN 311 Syntax Recitation

Apr. 5, 2019

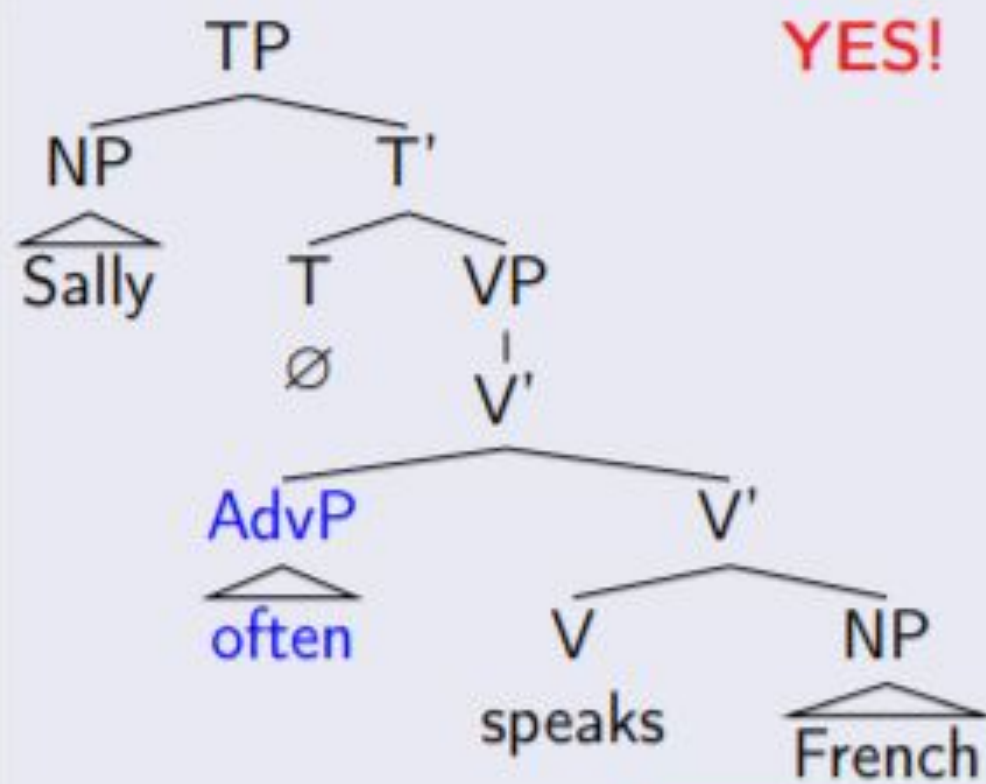

Any generalization on the position of adverbs/ negation?

- (1) a. Sally **often** speaks French.
b. Sally speaks French **often**.
c. *Sally speaks **often** French.

Draw the trees for 1a, 1b

- (2) a. Sally can speak French.
b. Sally can **not** speak French.
c. * Sally **not** can speak French.
d. * Sally can speak French **not**.

YES!

V to T movement

Draw the trees for (2) and (3).

- (1) John had written.
- (2) John had **not** written.
- (3) John had **cautiously** written.

modals on T

Draw trees for these sentences.

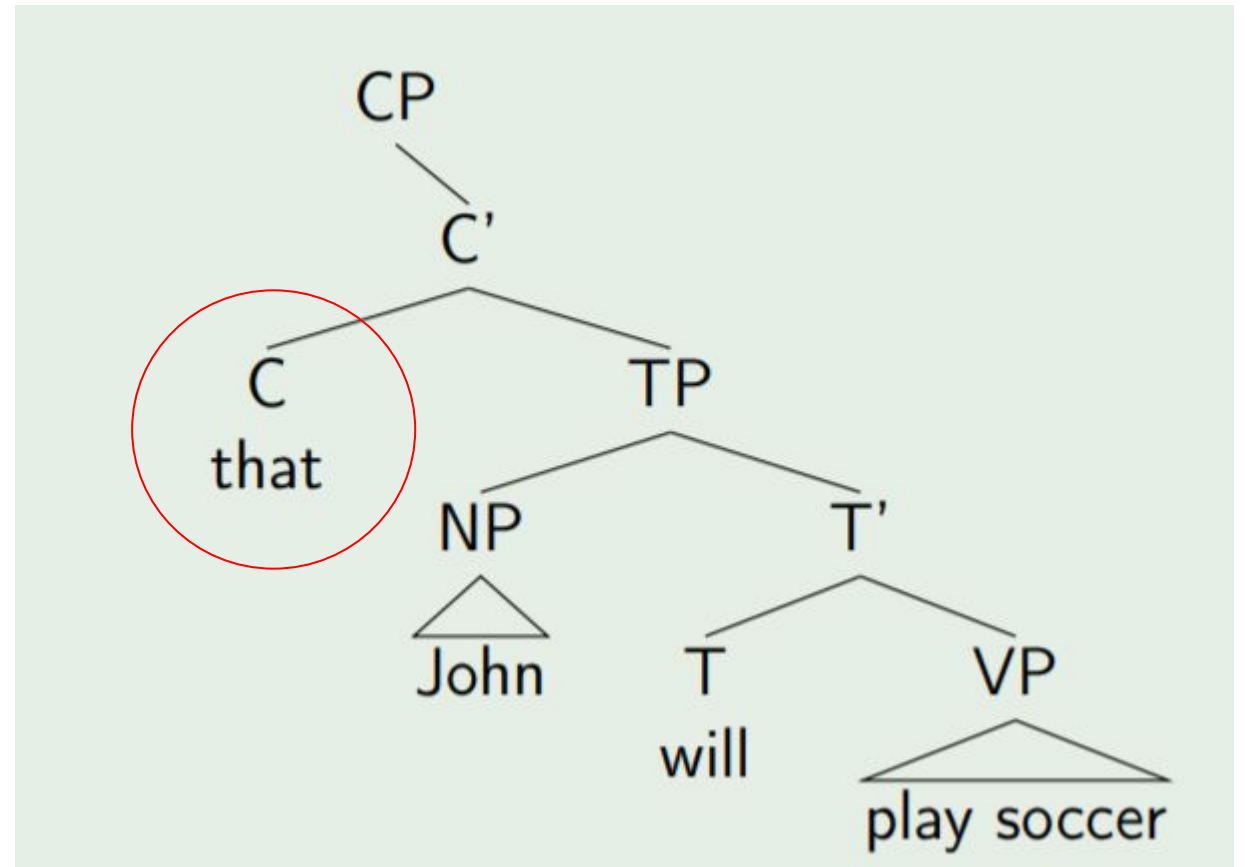

- (1) Sally can not dance.
- (2) Sally can hardly dance.
- (3) Sally does not dance.

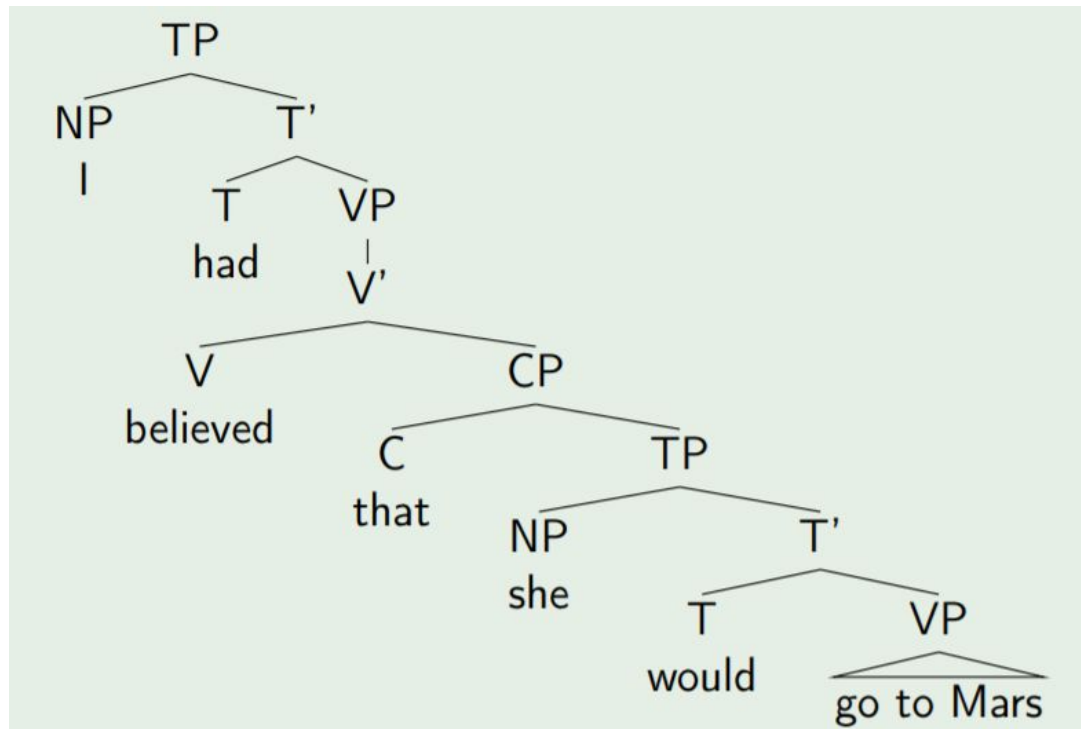

CP

C: that, whether, if....

CP as a complement of a verb

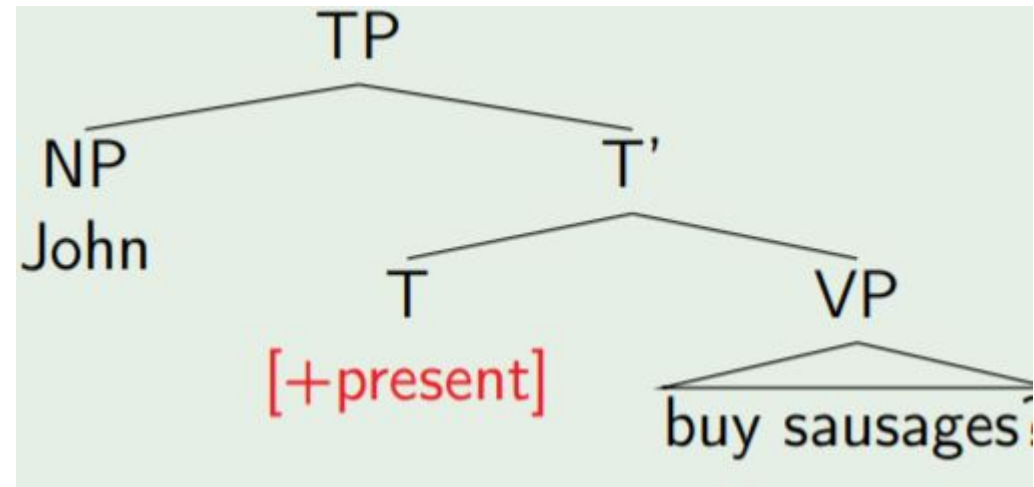

- (1) I had believed **that she would go to Mars**
- (2) I had wondered **if she would go to Mars.**

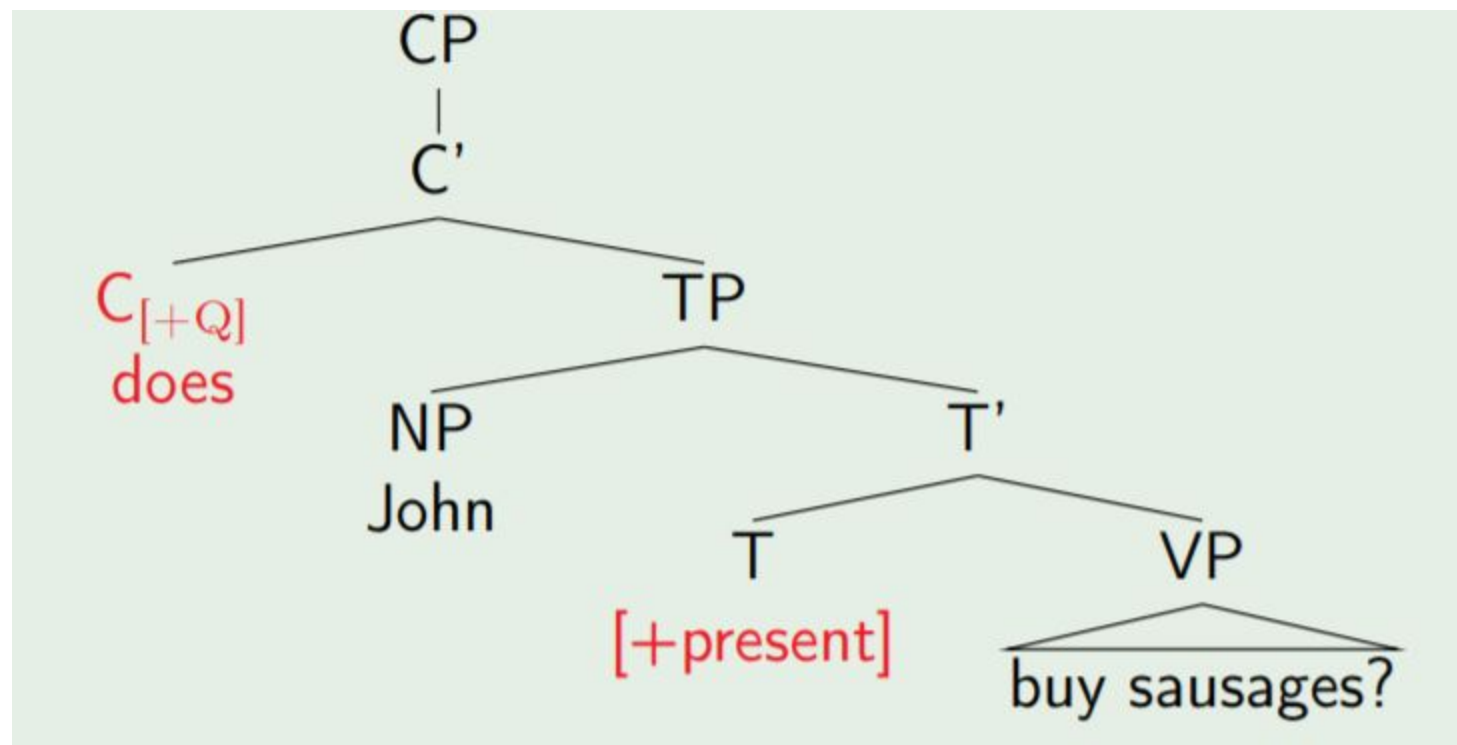

Yes/No-questions

- In Yes/No-questions, the element in main clause T moves to C.

- (1) Will John buy sausages?
- (2) Does John buy sausages?

C_[+Q]

Question: why b is ungrammatical?

- a. I wonder **if** C_[+Q] **Michael had owned a pet duck.**
- b. *I wonder **if had Michael owned a pet duck.**
- c. Had Michael owned a pet duck?

I wonder $\text{if}_{C[+Q]}$ Michael had owned a pet duck.

Case

- a. She loves her.
- b. *She loves she.
- c. *Her loves her.
- d. *Her loves she.

Why are sentences above ungrammatical?

*(note: the ungrammaticality cannot be accounted by θ -theory:
number of arguments is right.)*

A few important cases

Case	Usage
Nominative	Subjects of <i>finite</i> clauses
Accusative	Direct objects
Dative	Indirect objects
Genitive	Possessor (like 's in English)

Is Case and θ -roles in a one-to-one corresponding relation?

- a. **She** loves Bill.
- b. **She** is loved by Bill.
- c. I believe **her** to be happy.
- d. I believe that **she** is happy
